the
EDUCATION-2.0

INTRODUCTION

In this modern world ,Education plays a key role and now is the perfect time to speed up pace of modern education learning.

Our team sees this education sector with vision that it must be available for each and every one who has desire to learn and grow without any cost,because being a student we can feel that education will be for all only if it is of minimum cost .

This project tries to bind this gap in education sector,This project is not fullproof in itself and requires further development but this project should b viewed as change that should be embraced profoundly.

UNITE-AR

Zero coding AR platform to build white labelled AR Apps, WebAR plugins

and augmented reality experiences.

Basically UNITE-AR is an augmented reality software which is used to

augmented the visuals and apply them into education,entertainment,or

for business purposes.

3

SYMBL API

Symbl.ai is an API platform for businesses looking to deploy conversational intelligence. Symbl offers a comprehensive suite of APIs for analyzing natural human conversations, without the use of up-front training data, wake words, or custom classifiers.

Symbl.ai uses machine learning to analyze conversations in real time. The company's aim is to eliminate the complex process of building and maintaining conversational understanding systems, so developers can focus on building experiences and services on top.

API services -

Streaming API, Async API, Telephony API, Pre-Built API
